Dr. Andrés Hidalgo elected a member of the European Molecular Biology Organization – EMBO

06/07/2022

Through this lifelong honour, new EMBO Members and Associate Members are recognized for their outstanding achievements in the life sciences

Dr. Andrés Hidalgo has been elected a member of the European Molecular Biology Organization (EMBO). EMBO today named the 56 new members who will form part of this organization of more than 1800 leading scientists from Europe and around the world.

With the incorporation of Dr. Hidalgo, there are now six members of the Centro Nacional de Investigaciones Cardiovasculares (CNIC) in EMBO: Dr. José Antonio Enríquez, Dr. Miguel Ángel Del Pozo, Dr. Miguel Torres, Dr. Pura Muñoz and to Dr. Francisco Sánchez Madrid.

EMBO announces that 67 researchers have been elected to its membership. Through this lifelong honour, new EMBO Members and Associate Members are recognized for their outstanding achievements in the life sciences.

“The new EMBO Members and Associate Members are exceptional scientists, who carry out leading research across a variety of fields, ranging from cell biology and cancer to vaccine development and machine learning,” says **EMBO Director Fiona Watt**. “I am delighted to welcome them to EMBO, and I know that they will enrich the life of the organization immensely.”

Members provide guidance and support for EMBO activities, for example by evaluating funding applications, serving on EMBO Council and committees, or joining the editorial boards of EMBO Press journals. Through their involvement, members help to shape the direction of life sciences, foster the careers of young researchers, and strengthen the research communities in Europe and beyond.

New members are nominated and elected by the existing EMBO Membership. The annual process ensures a broad scope with the flexibility to expand into newly emerging fields in the life sciences.

EMBO will formally welcome the new members at the annual Members’ Meeting in Heidelberg between 26 and 28 October 2022.
