The First 2026 Competitive Call for Unique Scientific and Technical Infrastructures of the Distributed Biomedical Imaging Network (ReDIB) Is Now Open

27/04/2026

The Distributed Biomedical Imaging Network (ReDIB) has launched the **First 2026 Competitive Open Access Call** for its Unique Scientific and Technical Infrastructures (ICTS).

The application period will remain open until **May 19, 2026**. Applications must be submitted through the ReDIB web portal:
https://portal.redib.net/calls/1/ (call **20601**).

ReDIB provides competitive open access to researchers working in public or private R&D institutions. Access is open to both the national and international scientific community.

This call offers access to advanced clinical and preclinical biomedical imaging infrastructures, supported by expert staff across the different nodes of the network. Its objective is to promote high-quality research, fostering innovation and scientific collaboration.
All relevant information regarding the application process, evaluation criteria, and technical requirements is available in the following official document:
