

Juan de la Cierva Postdoctoral position at the Spanish National Cardiovascular Research Center (CNIC), Madrid (SPAIN)

The *Intercellular Signaling in Cardiovascular Development & Disease* group, led by **Dr. José Luis de la Pompa**, is recruiting a postdoctoral scientist to work on the developmental genetics of congenital heart disease & cardiomyopathies. We invite you to learn more about our research at [Lab web page](#) and [Group papers](#). We welcome highly motivated candidates who want to continue and consolidate their career. Eligible candidates should possess previous experience in: Vertebrate developmental biology, mouse genetics, *in vivo* or *in vitro* gene editing techniques, confocal microscopy, gene profiling & bioinformatics...

The postdoctoral researcher will work in a project focused on the *Molecular mechanisms of ventricular chamber development, congenital heart disease and cardiomyopathy*.

Eligibility Criteria

- Enthusiastic and highly-motivated young investigator
- PhD degree obtained between January 1st 2022 and December 31st 2023.
- A good publication record (at least 2 first-author papers in top journals)
- Authorship of publications in indexed journals will be valued positively.
- Selected candidates are expected to apply for their own funding to the current Juan de la Cierva Call:
