

Master student at the Centro Nacional de Investigaciones Cardiovasculares (CNIC), Madrid

The Translational Laboratory for Cardiovascular Imaging and Therapy, led by Dr. Borja Ibáñez Cabeza, is looking for a Master's Student to work in the group's research lines. Candidates must be highly motivated and want to start their research career in Biomedicine. The selected candidates will opt for a Master Acciona scholarship.

The selected candidate will work on the study of myocardial diseases, ranging from ischemia/reperfusion to heart failure, including that associated with cancer therapy-induced cardiotoxicity. Group information:

<https://www.cnic.es/en/investigacion/translational-laboratory-cardiovascular-imaging-and-therapy>

Eligibility

- Enthusiasm and motivation will be highly valued
- Previous research experience during the degree will be positively valued

IMPORTANT

Interested candidates must apply to the scholarship program: <https://www.cnic.es/en/convocatoria/becas-master>

Please send motivation letter, contact information and CV to:

lcadiz@cnic.es not later than May 15th.
