2nd Call

OPEN NOW - CLICK HERE TO APPLY
Deadline November 30, 2024

Cure Heart & Brain is open to excellent researchers of any nationality to perform research on heart and brain and their connection, which are issues of utmost medical and social importance.

**Up to 12 fellows will be recruited in 2024 & 2025.
The duration of each position will be 36 months.**

Incorporation within the Cure Heart & Brain programme:

- ▶ **Training:** the programme will offer training to develop key transferable skills and competences, foster innovation, entrepreneurship, promote Open Science practices, FAIR data management, and public engagement. The fellows will acquire new skills through advanced training, international, interdisciplinary and inter-sectoral mobility.
- ▶ **Secondment options at Associated Partners premises:** Cure Heart & Brain includes 24 Associated Partners from all over the world and from different sectors (12 Partners from non-academic sector).
- ▶ **Supervision by the CNIC's Group Leaders and co-supervision by PIs from Associated Partners.** Evaluation The selection and recruitment process will follow the European Charter and Code for Researchers and Code of Conduct for the Recruitment of Researchers and will be merit based, independent and transparent. Applications will be evaluated on merit-based principles and their scientific excellence by external evaluators (the details are described in the "Guide of Applicants").

Applicants will be required to fill in administrative form and provide the documents required.

Candidates that passed the eligibility check will be put in touch with the hosting research groups at CNIC and will prepare a project proposal (including Career Development Plan) with the help of one of the Group Leaders of their choice. Contact with Associated Partners for secondments options will be facilitated by CNIC.

▶ *Fellows are allowed to choose CNIC's host group and secondment options. Applicants are free to propose a research topic, as far as it fits within scope of the centre and is it feasible to implement at CNIC.*

Co-funded by
the European Union

This employment contract is co-funded by the European Union's Horizon Europe research and innovation programme under the Marie Skłodowska-Curie grant agreement No GA-101126521 with the amount of 3.980 euros per month for the whole duration of the contract (36 months).

The CNIC receives support from the Carlos III Health Institute (ISCIII), the Ministry of Science, Innovation, and Universities (MICIU), and is a Severo Ochoa Center of Excellence. This poster is part of the grant CEX2020-001041-S, funded by the MICIU/AEI/10.13039/501100011033.
